Education

Bhartiya Vidya Bhavan's Sardar Patel Institute of Technology Mumbai, India
B.Tech in Computer Engineering, Minor in Management SPJIMR (S. P. Jain Institute of Management & Research) Expected June 2027
CGPA: 9.26/10.0

Experience

Independent AI & Software Developer April 2026 – Present
Confidential Client (NDA-Protected) Remote, India

- Architected an end-to-end data pipeline using **Python** to ingest heterogeneous formats (**PDF, HTML, XLSX**) into reproducible **JSON & Markdown** with strict evidence provenance.
- Achieved **91.7% correctness** in document extraction via **Docling** section-aware retrieval, local **Ollama** inference, and deterministic validation.
- Engineered a citation-grounded RAG agent using **LangGraph, Pydantic, SearXNG, Playwright, & Ollama** for query rewriting and quote-level verification with zero pipeline errors.

Undergraduate Research & Teaching Assistant Feb. 2025 – Present
Department of Computer Engineering, SPIT Mumbai, India

- Built automated ETL workflows via **Python (Pandas) & PowerShell** to process raw institutional data, generating **50+ dynamic PDF reports** and actionable KPI dashboards.
- Typeset a 130-page Ph.D. thesis on **Quantum-Inspired Machine Learning** using **LaTeX & TikZ**, managing modular chapter builds and strict version control.
- Streamlined academic compliance and CO-PO mapping for Outcome-Based Education (OBE) frameworks by developing custom **VBA macros** for IEEE & IJETT publications.

Data Analyst Intern (Summer Internship) [Certificate Link](#) — June 2023 – July 2023
R3 Systems India Pvt. Ltd. Nashik, India

- Built **Power BI** dashboards for business datasets, including an interactive **Northwind Traders** sales dashboard covering sales, customer, product, and regional trends.

Projects

GraphShield – Real-Data Graph ML for Financial Fraud Detection [Project Link](#) — June 2026

- Engineered a dual-path spectral GNN evaluated against **GraphSAGE** on a **3.7M-node, 4.3M-edge DGraphFin** dataset using strict leakage-safe splits.
- Validated robustness via **6-seed real-data ablations** achieving **0.7748 AUC-ROC**, integrating **paired-bootstrap testing**, conformal calibration, and temporal drift diagnostics.
- Tech:** Python, PyTorch Geometric, Scikit-learn, XGBoost, DGraphFin, Spectral Graph Filters, Conformal Prediction, Pytest

UPI Analytics Platform – Data Engineering & Analytics Dashboard [Project Link](#) — March 2026

- Processed **9,026 JSON files** via a 4-stage medallion pipeline into a **DuckDB** star schema, deploying **68 visualizations** on **Streamlit & Power BI** with GitHub Actions CI/CD.
- Quantified market duopoly via **HHI & Gini coefficients**, segmented adoption with **K-Means**, and forecasted transaction volumes using **Prophet & ARIMA**.
- Tech:** Python, DuckDB, Pandas, Plotly, Streamlit, Power BI, Prophet, ARIMA, K-Means, GitHub Actions

Lex Simulacra – AI Legal Courtroom Simulator with Multi-Agent RAG [Project Link](#) — November 2025

- Architected an **8-agent** courtroom simulator using **LangGraph** with stateful multi-turn debate, served via a real-time **Streamlit** UI and **FastAPI SSE**.
- Built a citation-grounded RAG pipeline over **100K+ legal documents** using **ChromaDB & BM25**, boosting context relevance by **3.2×** via hallucination checks and context compression.
- Tech:** Python, LangChain, LangGraph, FastAPI, Streamlit, ChromaDB, Ollama LLM, Kanoon API, BM25

Skills

Languages: Python, C, C++, Java, JavaScript
Frameworks: Flask, Django
Data-Science/ML: Pandas, NumPy, Matplotlib, Seaborn, PyTorch, Scikit-Learn, TensorFlow, Hugging Face, Keras, OpenCV
Databases/DevOps: SQL, MongoDB, Firebase, Git, GitHub
Business Intelligence Tools: Power BI, Tableau
Soft Skills: Leadership (served as General Secretary, Student Council), Time Management, Public Speaking, Writing, Communication

Achievements

Winner – Tech Horizon National Hackathon [Project Link](#) — March 2025

- Secured **1st place out of 80+ national teams** in a 36-hour hackathon by engineering a full-stack donation platform featuring **LLM-driven donor-NGO matchmaking**.
- Eliminated fund misuse by architecting a transparent ecosystem with automated supplier-based routing, smart request tracking, and strict fraud-prevention logic.
- Tech:** React, TypeScript, MongoDB, Vite, Tailwind CSS, React Router, Context API [Certificate Link](#)
